

Compass 2022 May 2-5 in San Antonio

Air Force Civil Engineer Center Geospatial Integration Office (AFCEC GIO) invites you to join Compass 2022 on May 2-5, in San Antonio, Texas, at the Henry B. González Convention Center. Compass 2022 presents the Air Force Geospatial community and stakeholders the opportunity to participate and discover the latest GI&S efforts. This event features training for geospatial applications, resource sharing, best practices of our rapidly advancing geospatial capabilities, and skills development to support your organization's mission, Airmen, and the Air Force.

Hosted by the Air Force Civil Engineer Center Geospatial Integration Office (AFCEC GIO), Compass 2022 curates an experience that focuses on the utilization of cutting-edge tools and technology and fosters engagement through both learning and networking opportunities. With Geospatial Information & Services (GI&S) becoming more powerful and accessible because of rapid advances in capabilities and technology, Compass 2022 supports our installation's mission and leverages GI&S to make the most of our resources. Geospatial analysts will provide a wide range of learning and networking opportunities, demonstrating cutting-edge GI&S tools.

Compass 2022 sessions will focus on the following content areas:

Expeditionary and Pre-Deployment

Content that focuses on the skills, materials and resources that support the unique challenges of Airmen as they prepare for and execute missions within deployed environments.

Garrison

Content that focuses on the skills, materials and resources that support the daily workflow and challenges at the installation level. This tract encompasses content that relates to all roles within the GeoBase community (field analysts, GIOs, Airmen, supported partners, etc.)

Impact & Improvements

Content that focuses on how recent developments, procedures, and technology significantly impacts your team, installation, or mission. This includes content regarding the future trajectory of GeoBase.

Policy & Procedures

Content that focuses on best practices within the GeoBase community. This content is intended to share vital information, standards and working policies.
